

Make a Christmas stained glass window

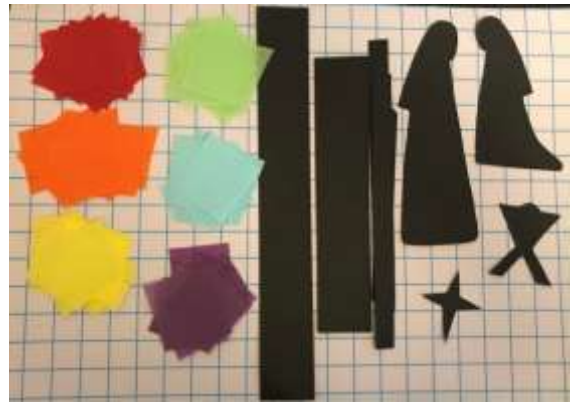

You need:

Clear sticky backed plastic (I used A3 size)

Print out of template

Black card – copy and cut out

Coloured tissue paper cut into squares

Arrange the figures on a flat surface.

Cover with the plastic – sticky side up – so you can see where the figures will be.

Attach the tissue paper to the sticky surface – think about the pattern you want before you stick! Leave a 1cm border.

Now attach a black card frame and glue on the figures and the stable.

Place on a window!
